Freshtables Steam Perfect Green Beans in Butter Sauce

Easy Addition to Thanksgiving or Holiday Table

By jcorn

Brand new to the market, as of late September, Freshtables Green Beans offer the benefit of fresh-steamed, green beans, which cook evenly in only a few minutes in their own pouch. You do not even have to punch holes in the bag before cooking in the microwave, and the beans are coated in a rich, garlic butter sauce. This is a gourmet product, suitable for guests. Information about this product can be found at <http://www.freshtables.com>, something I discovered after trying them.

Takeaways

- Brand new vegetable product
- Cooks in two minutes in a bag that does not need to be vented for microwave use
- Gourmet quality, perfect for Christmas or Thanksgiving meals

Freshtables Green Beans in Garlic Butter Sauce: Taste

I have often prepared freshly steamed green beans, but only after pulling off the strings and cutting off the end pieces. Freshtables has eliminated those steps. I cooked mine an extra two minutes longer than recommended on the package and still had nice, crisp beans coated in a rich garlic butter sauce. Many people could get by with cooking them for only two minutes if you prefer crisper beans.

My husband raved about how wonderful they tasted and how the sauce was special and unique. My teenage son ate his entire portion as well, eagerly. Rarely do they both like the same foods so I considered this a major triumph. I also loved them, and the ease of preparation was a major plus, too. The sauce is not runny but coats each individual bean and the vegetables look and taste as close to fresh-picked as I can imagine any store bought vegetable to be. We were all happily surprised by the taste. By the way, the garlic taste is **not overly** strong so it won't have people reaching for water glasses or breath mints.

Freshtables Green Beans : Quality

From start to finish, no complaints. The beans come in a very attractive bag and we didn't even cook them the same day we bought them, but a few days later. There seemed to be no loss of quality or taste. One major feature that I absolutely liked was that the bag does not need to have vent hole poked into it. Preparation is as simple as sticking in the microwave and cooking it. No mess, no fuss. Freshly steamed vegetables retain nutrients and the tightly closed bag keeps vitamins with the beans, not disappearing into steam.

Freshtables Green Beans: Price

It was on sale for \$1.99 a bag.

Freshtables Green Beans: Serving Suggestions

I absolutely plan on making this a part of my Christmas and Thanksgiving dinner menus. The sauce elevates what would be a plain side dish to gourmet status and the freshness of the beans could easily convince guests that you spent time preparing fresh green beans from scratch. I might add a couple of thinly sliced lemon wedges or shavings to complement the green of the vegetables but there really isn't much need to add anything to these. They are perfect just as they are. I served mine with **Tuna Casserole** and the garlic sauce jazzed up a rather routine meal. At Thanksgiving or Christmas, I would serve these with turkey and dressing, sweet potatoes, cranberry sauce, fresh rolls and perhaps sprinkle some gently toasted and crushed hazelnuts on top of the beans.

Freshtables Green Beans: Customer satisfaction

I was skeptical before buying these and absolutely crazy about them afterwards. I couldn't be more satisfied. . The product lived up to the promises on the package to be steamed perfectly in two minutes and to cook in the bag without any need to have air holes poked in the bag. As a result, no sauce dripped out.

Freshtables Green Beans Sources

I bought mine at a local Marsh Grocery store. I could not find online sources, but I suggest you look in the fresh vegetable section of your grocery store. That is where they were located.
